Software Developer
Python, C/C++
3.9/4.0 GPA

Education

MISSISSIPPI STATE UNIVERSITY, STARKVILLE, MS

Computer Engineering, Bachelor of Science, May 2019 - GPA: 3.9/4.0

Professional Experience

DYNETICS, HUNTSVILLE, AL

Software Developer, 05/2018-08/2018

- In the first 2 weeks of internship created a missile signal decoder and showcased prototype to customers
- Developed firmware/software with VHDL and C to create high resolution sampling for RF data
- Designed Python/Lua application to process data from concurrent sources, allowing Dynetics to easily validate their in-house missile data link in an integrated system
- Packaged and delivered software, created user guide, installation guide, and functional qualifications test
- Maintained closed loop support with field test engineers to produce an extremely satisfied customer

GLAANCE LLC, STARKVILLE, MS

Co-Founder and Backend Web Developer, 10/2017-04/2018

- Led team of 6 students using Agile strategy to successfully meet several deadlines and raise \$10k in 2 months
- Used Flask Microframework (python), SQLAlchemy, and Cordova to create a beautiful web/mobile app.
- Followed best-practices to create RESTful API that responded to the AngularJS front end team
- Created Database Abstraction Layer to separate database from Flask and solve common query issues

MISSISSIPPI STATE - DR. BRYAN A. JONES, STARKVILLE, MS

Undergraduate Research Assistant, 05/2017-08/2017

- Created plugin for Atom in Node.JS that allows instant HTML preview of any source code
- Produced multi-threading TCP/IP server in Python to allow several clients to preview results simultaneously
- Implemented beta test of software and presented project to Shackouls Honors College for 3rd place award

COX ENTERPRISES, ATLANTA, GA

Project Engineering Co-op, 05/2015-12/2016

- Headed small team to create a regression analysis for company-wide energy/water use
- Assisted national field technician team for IoT generator monitoring equipment to maintain 95% up time

Skills

SOFT/FIRMWARE DEV - Python, PHP, Bash, Lua, Javascript, C++, C, Verilog/VHDL, MPLAB, Vivado, Qt

WEB DEV - HTML/CSS, Flask, Javascript, ReactJS, AWS, Apache, Postman, Jekyll, SQL, JSON

GENERAL DEV - Agile, Scrum, Object-Oriented Programming, Git, Mercurial, Scripting, Bash Scripting

Honors & Activities

- Team Leader for Senior Design – leading team of 5 to create an integrated glove using stretch sensors
- Community Service – Tutor for freshman engineers, volunteer for a weekly exercise event with children
- HackState hackathon 1st place recipient 2017 – Created an arm controlled robotic crane
- Undergraduate Research Symposium 3rd Place 2017
- MSU Presidential Scholar 2014-2015, 2017
- Pi Kappa Phi New Member and Volunteer Coordinator 2017
